MEMORANDUM FOR: Members of the NSSM-84 Steering Committee

SUBJECT : Working Group 5 Report

1. Attached is the final version of the report on the Warsaw Pact Threat as prepared by Working Group 5.

2. The report is divided into five parts. Parts I and II are devoted primarily to Warsaw Pact capabilities. Part III considers contingencies in which Pact forces might be used. Part IV estimates Pact military reactions to alternative US-NATO force structures and strategies. Part V consists of tables of estimated force strengths.

3. Throughout the process of producing this report, we have sought to bring to light significant differences of view among US analysts. These will be found throughout the text.

4. Working Group 5 continues to study the requirements of the other NSSM-84 working groups to determine their need for information and analysis [REDACTED]

25X1C

[REDACTED] not presented directly in the attached report. Should it be determined that such data could significantly alter the intelligence in the attached report, Working Group 5 will propose the publication of an annex to the attached report at a higher level of classification.

25X1C

5. Your attention is invited to page 74 of Part IV, where it is estimated that US withdrawals down to a level of 100,000 men would not, in and of themselves, alter the Soviet view of the dangers of initiating war in Europe. This differs from the statement on this point submitted by [REDACTED] in his first draft of Chapter VII of the Summary Report. The view in the present text reflects the subsequent consideration of the Working Group.
